Signer 1: Alice Example

Email: alice@redteam.kysigned.test

Provider: redteam.kysigned.test (selector rt2026)

Signed: 2026-06-20 10:00:00 UTC

Intent line: "I sign this document"

.eml SHA-256: 5e20b939a3076e87ef7c0e4197704cd2642ea87d30dc9a1d16ddffb967e9db3a

Signer 2: Bob Example

Email: bob@redteam.kysigned.test

On behalf of: Acme Corporation

Provider: redteam.kysigned.test (selector rt2026)

Signed: 2026-06-20 10:00:00 UTC

Intent line: "I sign this document"

.eml SHA-256: 59df8e73675b69018686f567023003b68b2455d6836a070dcb676fdef6662bcc

Names and organisations above are as declared by the parties; kysigned verifies control of the signing mailbox, not real-world identity.

Bundle fingerprint (SHA-256 of the embedded evidence):

3e43d0dd879f1deba19b69adfbf29436f5b0426617c805228e92a89b5fcb47fb

How to trust this document

This PDF is intentionally unsigned - no certificate, no seal, no CA. It opens clean in any viewer. Its authenticity comes entirely from the evidence embedded inside it (each signer's original provider-signed email + independent timestamps), which anyone can re-verify - offline, forever, even if kysigned no longer exists. See the embedded VERIFY-README.txt.

Verify independently: scan the QR panel on page 1, or visit
